

# Social Distancing

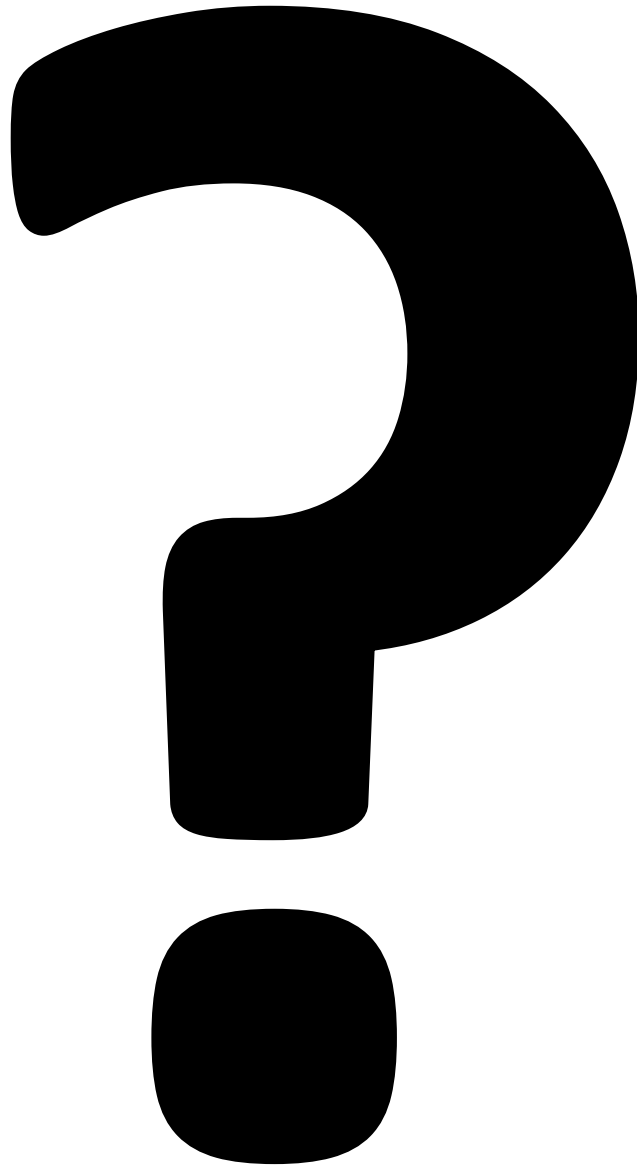

Pete and Patty are good friends.

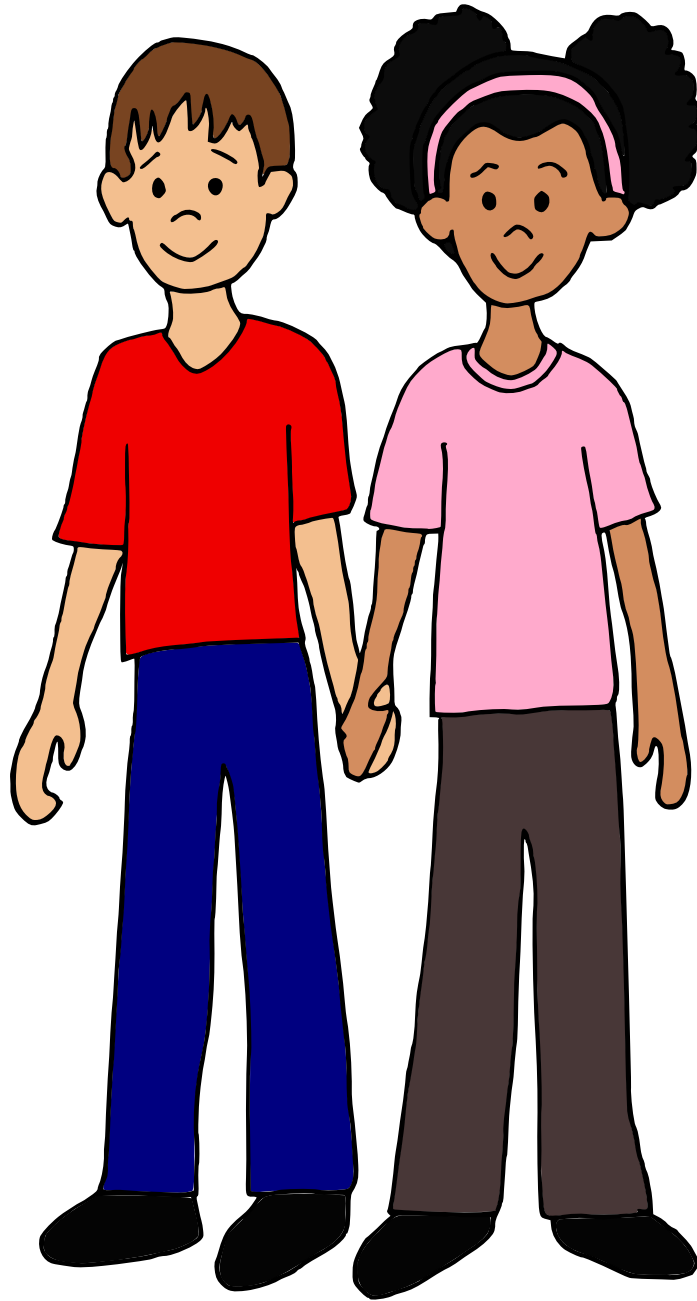

They like to play together.

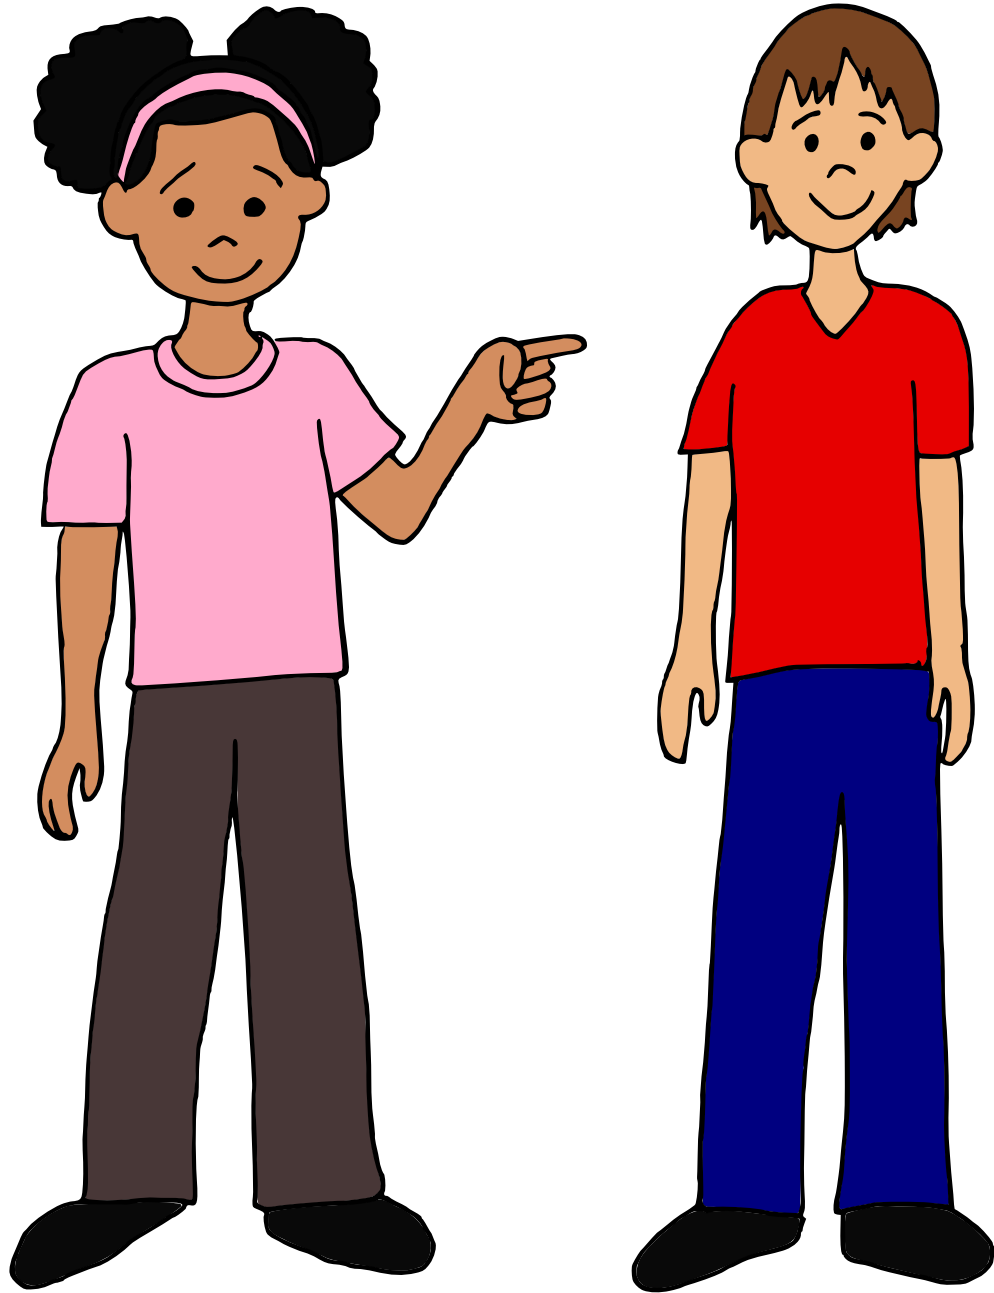

But right now they have to practice  
"social distancing".

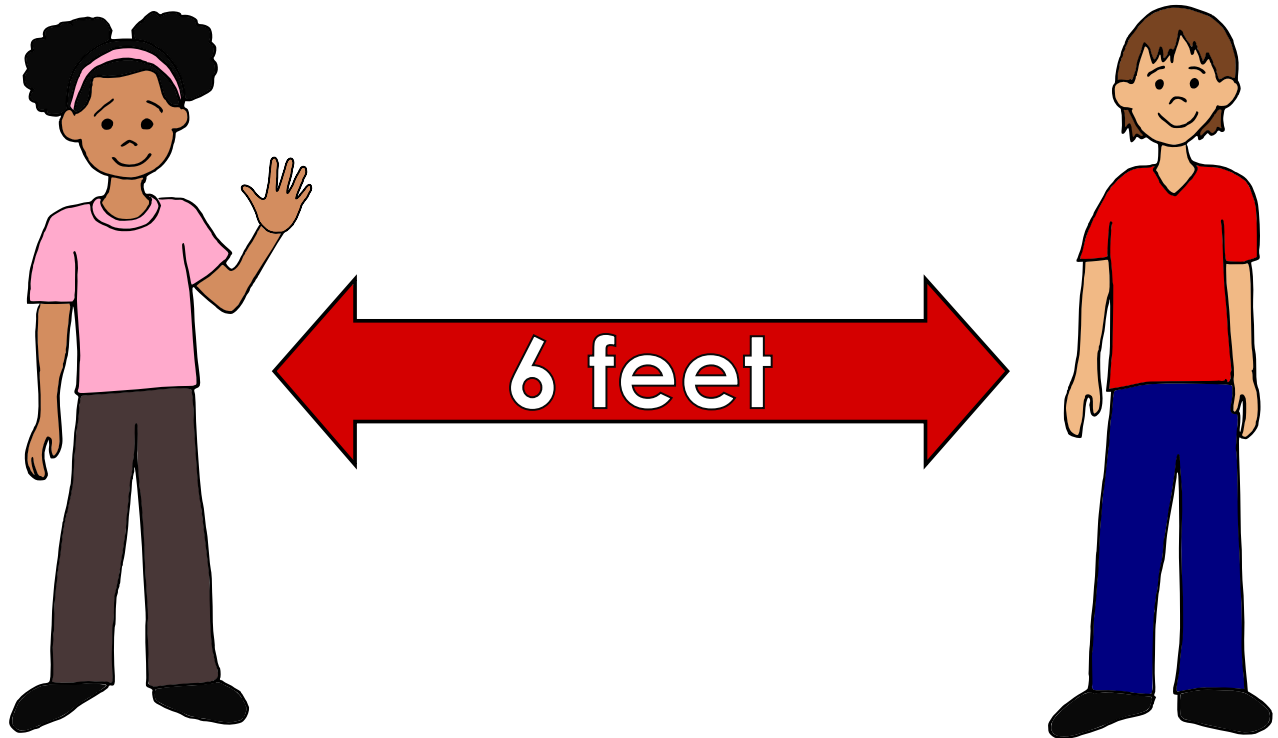

But how far is social distancing?

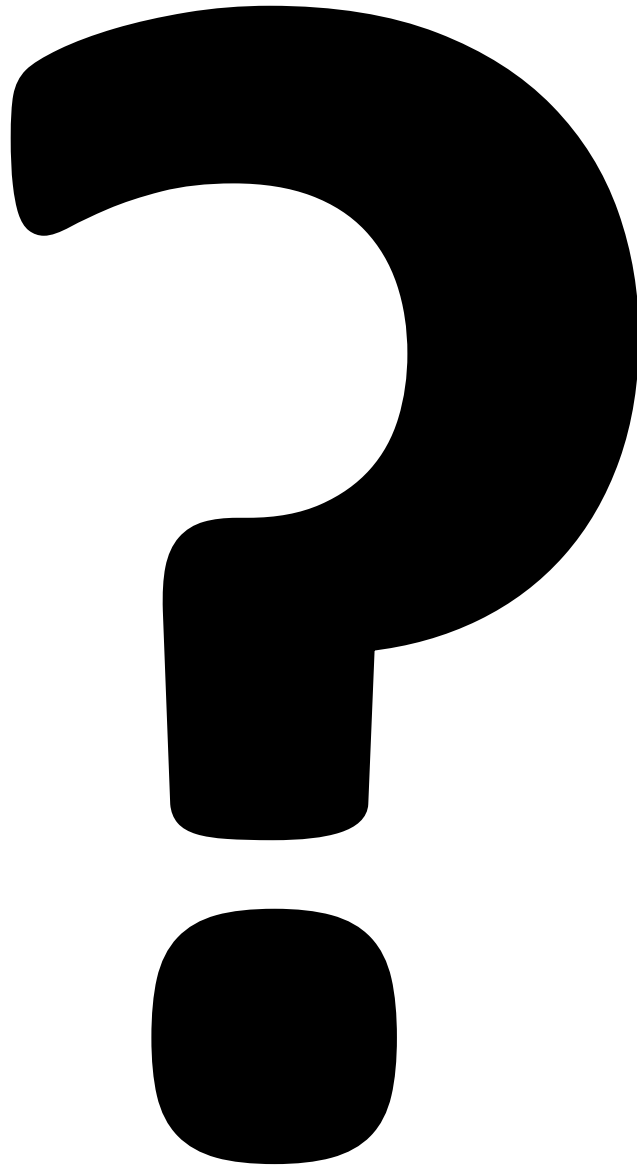

Is this okay? No, that is too close.

Is this okay? No, that is too close.

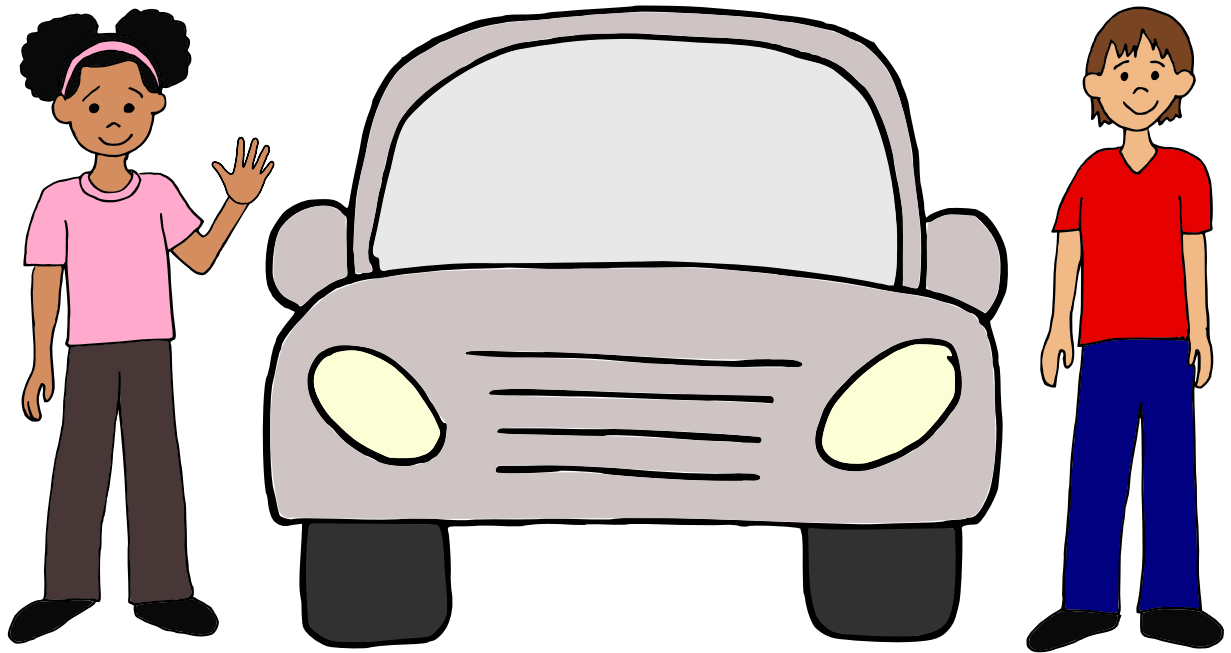

Is this okay? Yes! That is 6 feet.

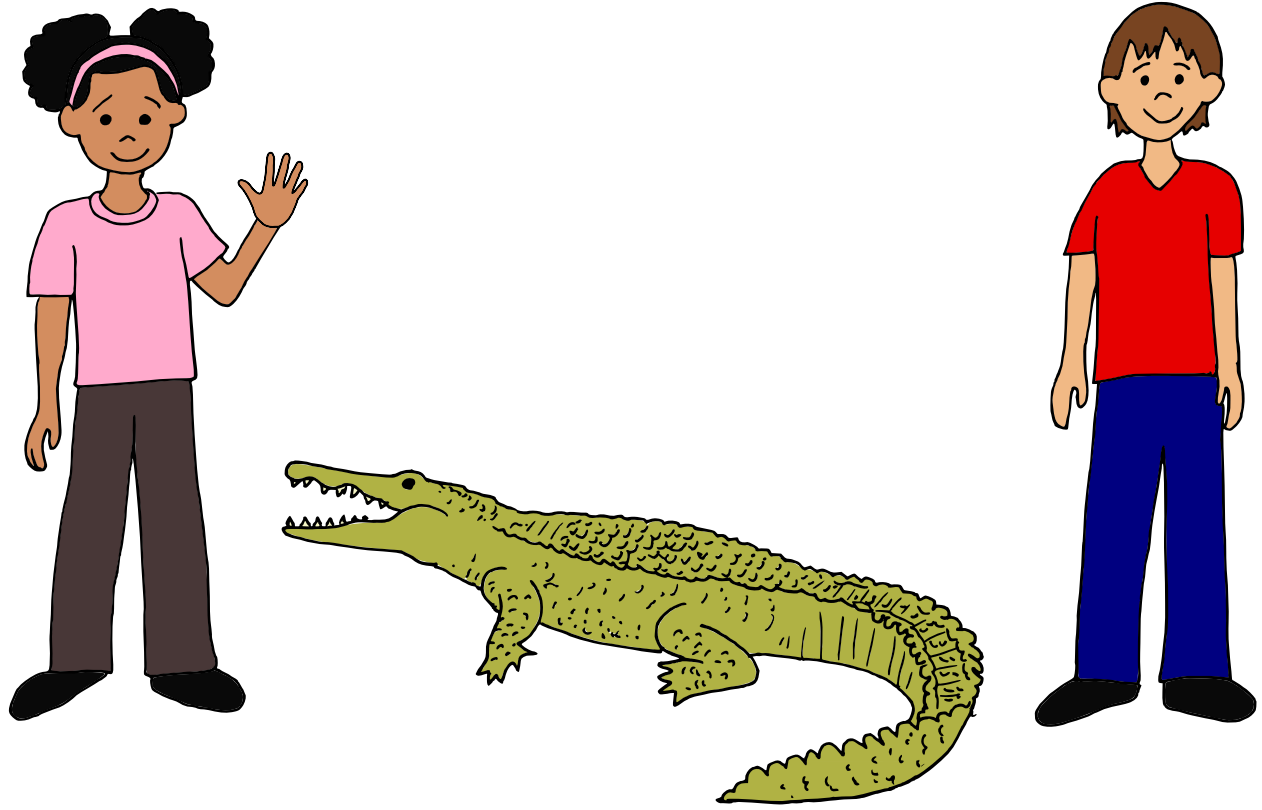

But how far is 6 feet?

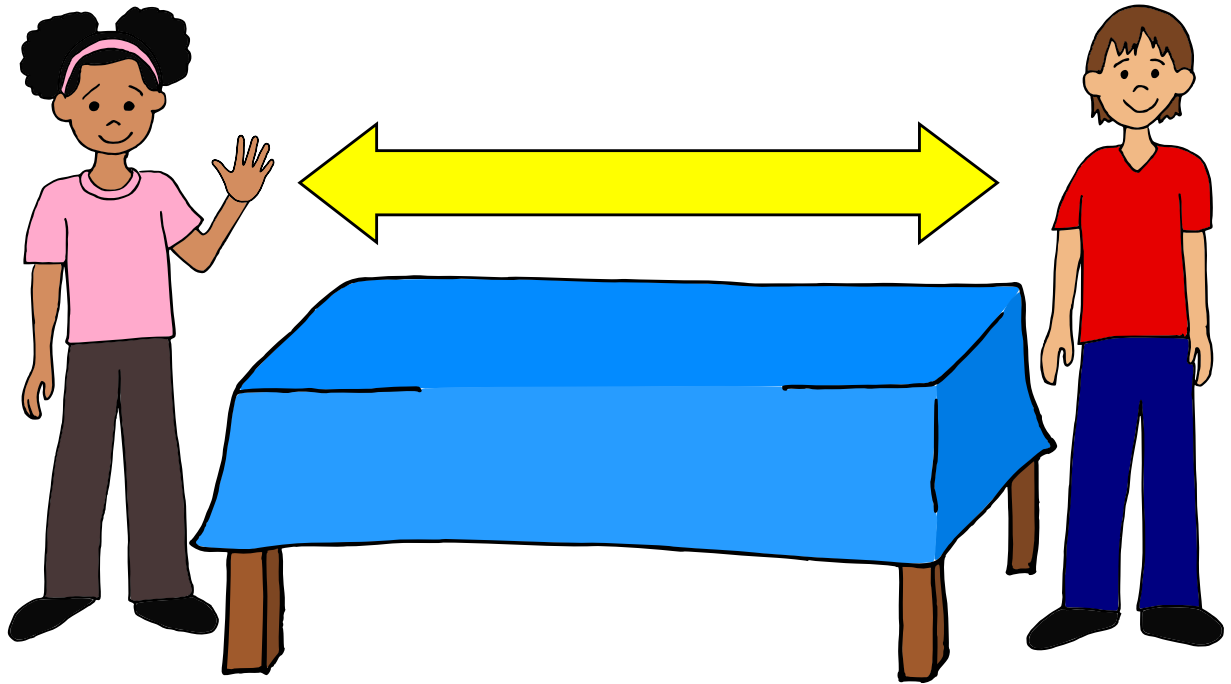

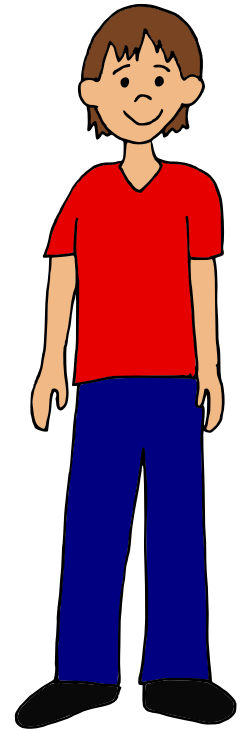

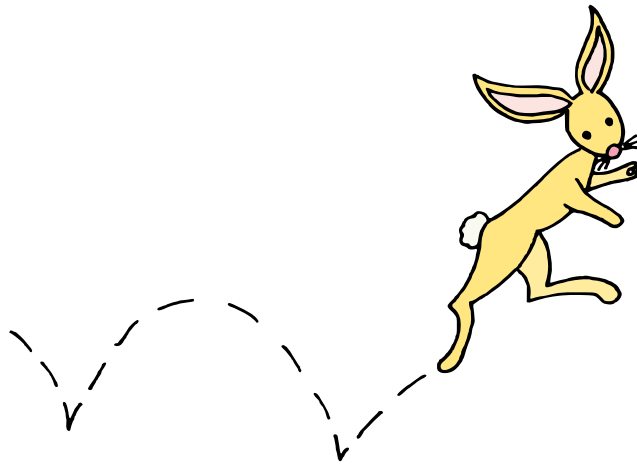

6 feet is one car across - stay in your lane!

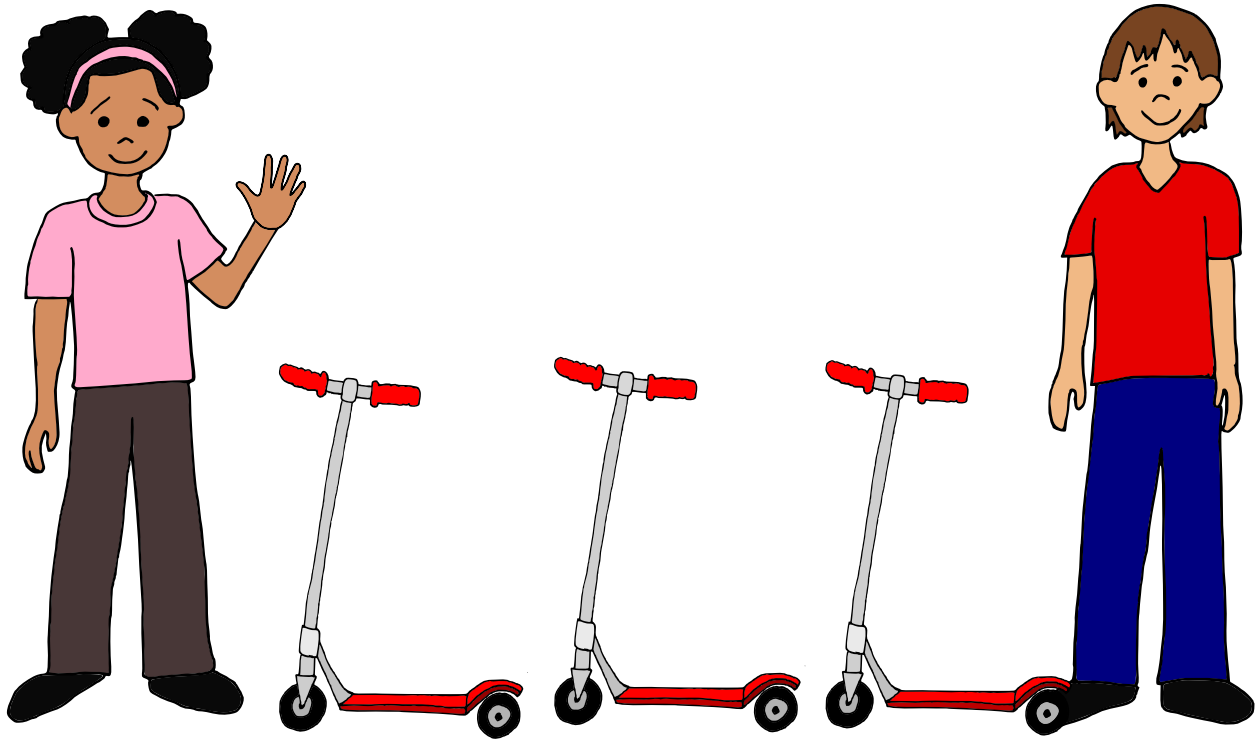

6 feet is one alligator between -  
watch out!

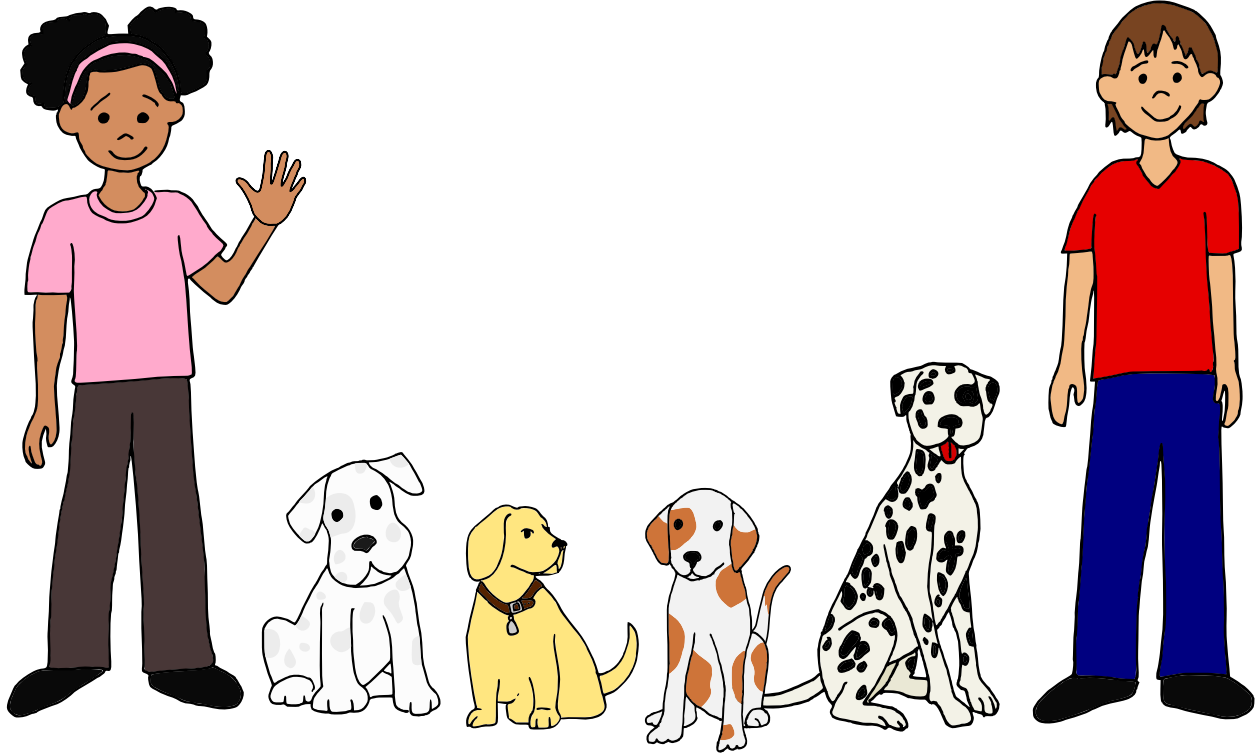

6 feet is one long table,

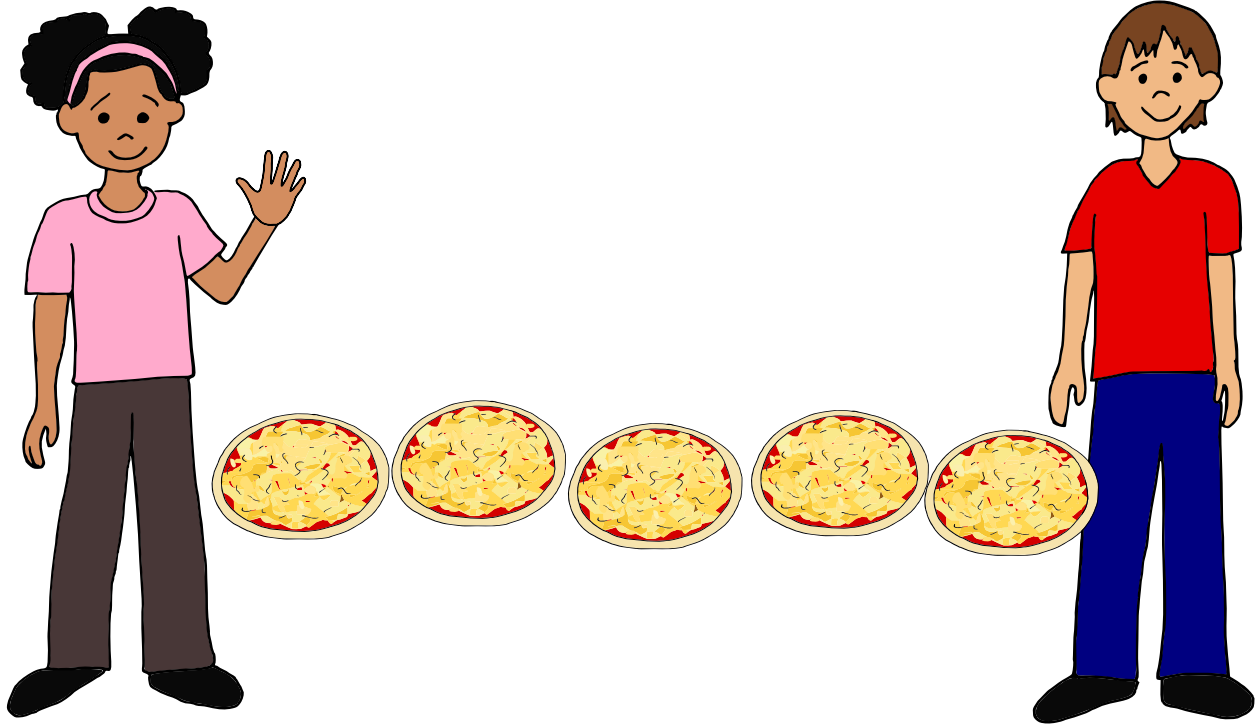

2 bunny hops

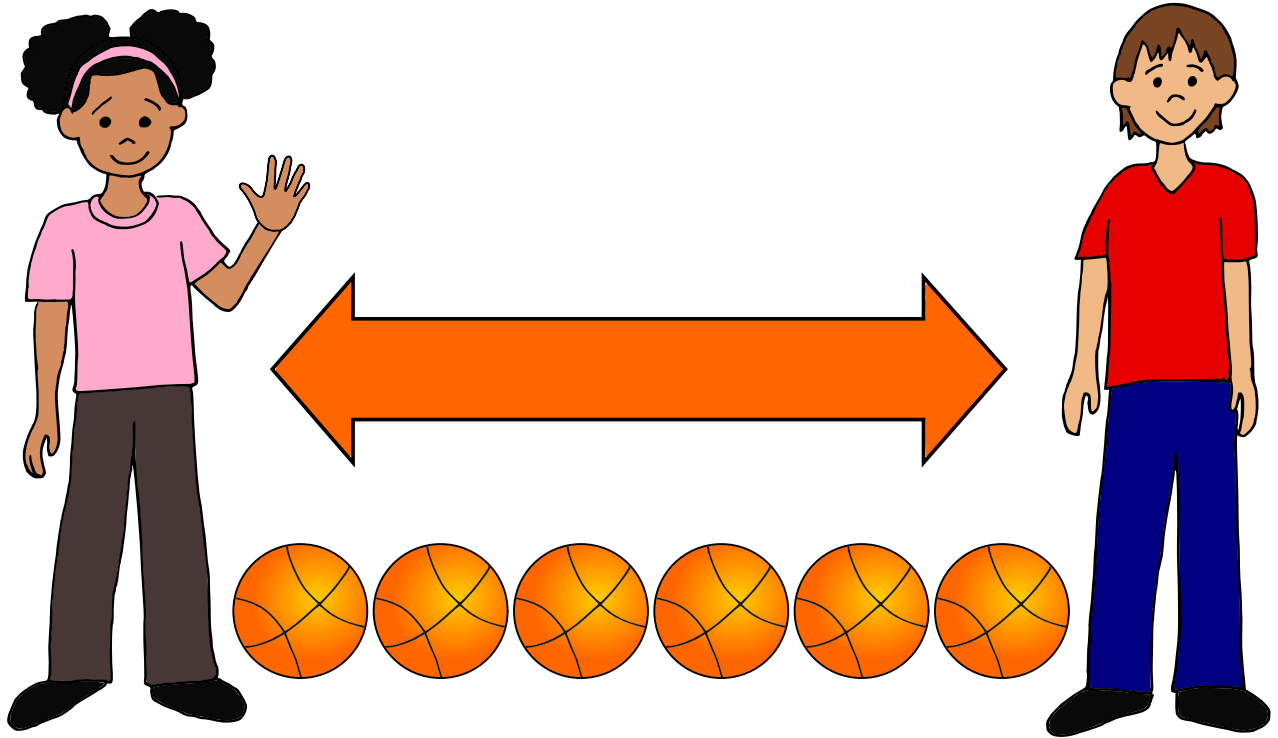

3 scooters

4 sitting dogs

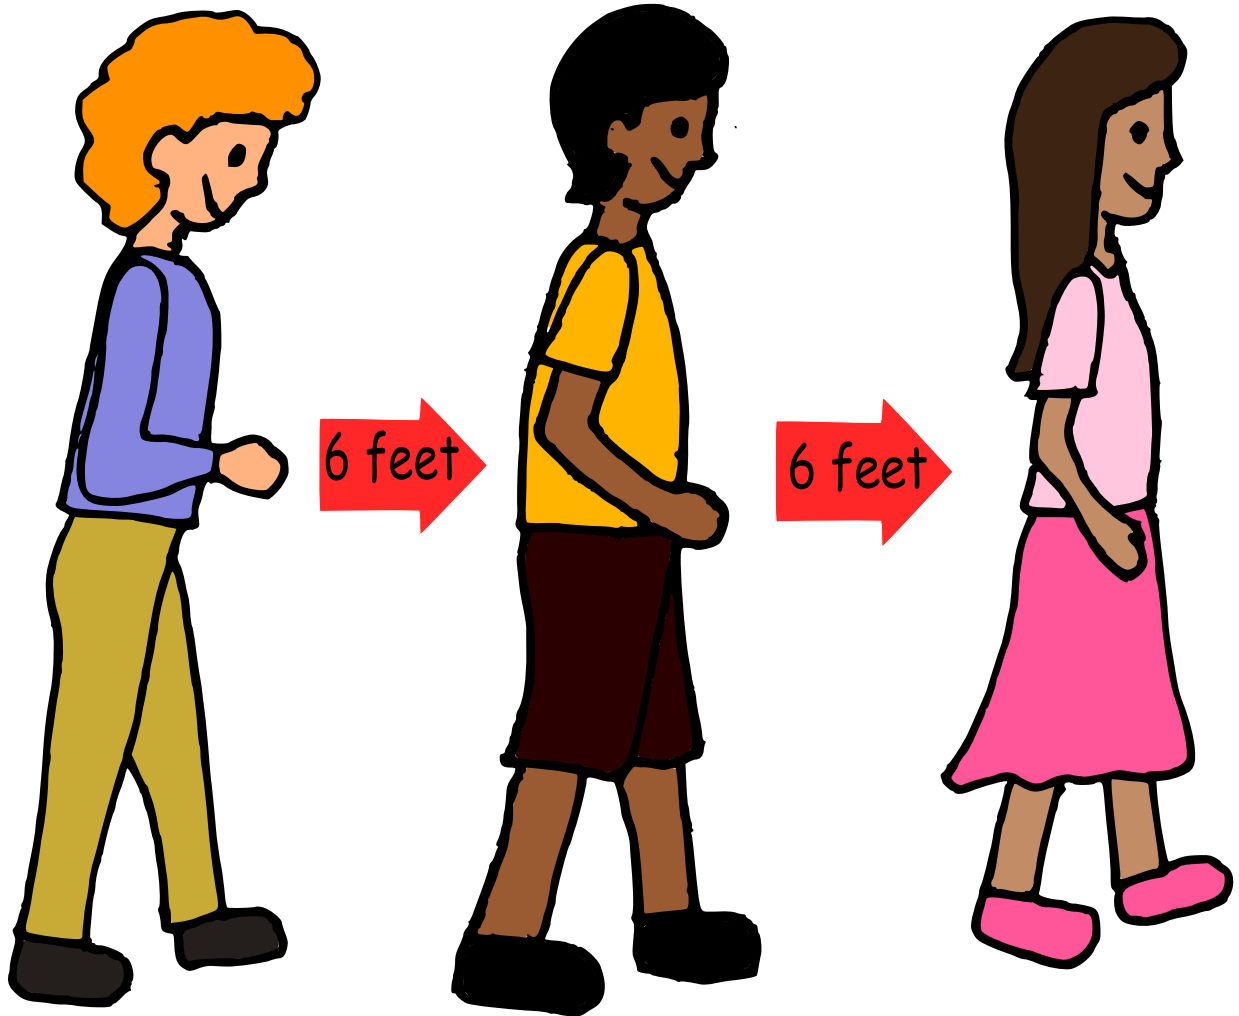

5 pizzas

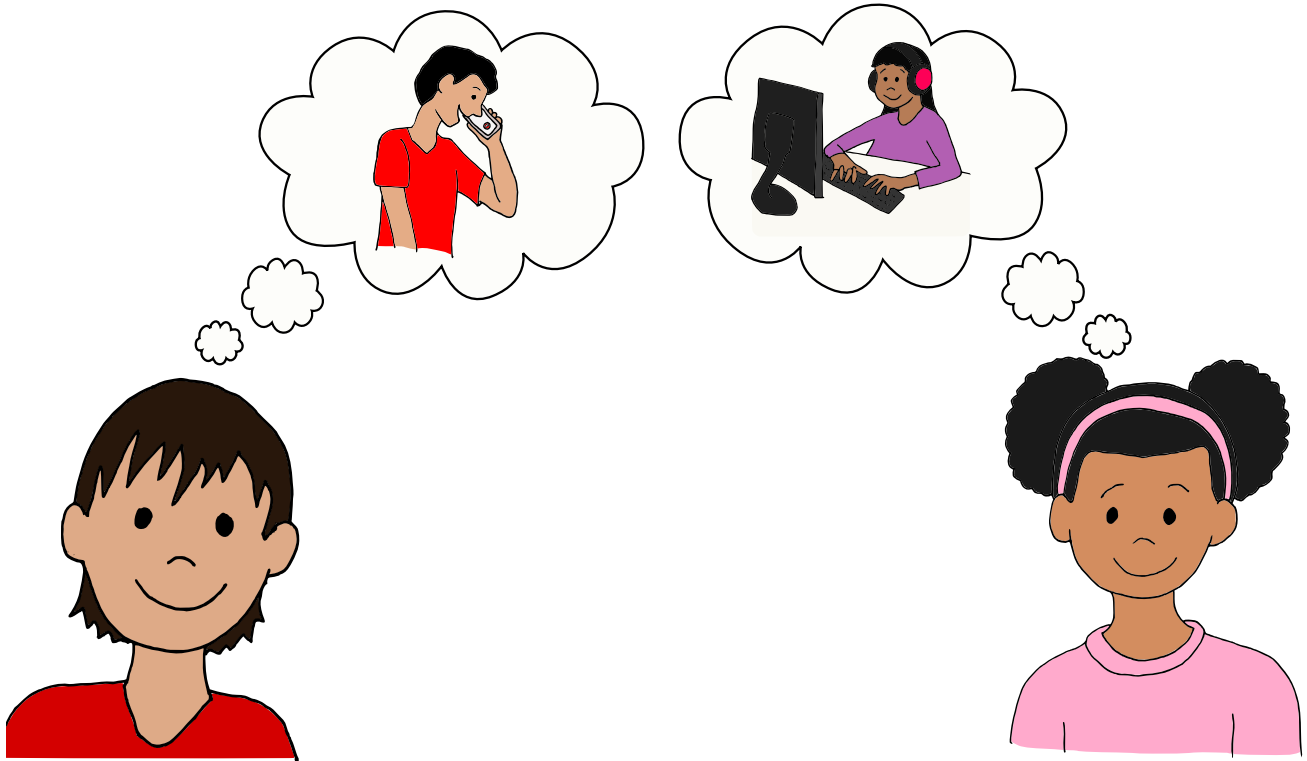

or 6 basketballs!

Remember you still need to be 6 feet  
away from your friends when lining  
up.

There are other ways to be together like on the phone or on the computer.

Pete and Patty keep apart for a little while because they care about each other. They are friends forever.
