# WHAT IS MONTESSORI EDUCATION?

Montessori is a method of education that is based on self-directed activity, hands-on learning and collaborative play. In Montessori classrooms children make creative choices in their learning, while the classroom and the teacher offer age-appropriate activities to guide the process. Children work in groups and individually to discover and explore knowledge of the world and to develop their maximum potential.

**Five basic principles** drive Montessori educators when implementing the Montessori method in any of a variety of programs. These principles include:

1. **Respect for the child:** Instruction is based on the needs of the individual child, not on presupposed curriculum expectations.
2. **The absorbent mind:** Children want to learn if given a robust environment in which to do it. They must be an active agent of their own learning.
3. **Sensitive periods:** All children go through predictable stages of development that underpins their needs as learners. Any effective educational program needs to respect these stages.
4. **The prepared environment:** A prepared environment is a place in which children can do things for themselves. The prepared environment makes learning materials and experiences available to children in an orderly format.
5. **Auto education:** Children are capable of educating themselves (also known as self-education). Children who are actively involved in a prepared environment and who exercise freedom of choice literally educate themselves. Montessori teachers prepare classrooms so that this can happen.<sup>ii</sup>

## MONTESSORI AT A GLANCE

Montessori classrooms are beautifully crafted environments designed to meet the needs of children in a specific age range. [Dr. Maria Montessori](#) discovered that experiential learning in this type of classroom led to a deeper understanding of language, mathematics, science, music, social interactions and much more. Most Montessori classrooms are secular in nature, although the Montessori educational method can be integrated successfully into a faith-based program.

Every material in a Montessori classroom supports an aspect of child development, creating a match between the child's natural interests and the available activities. Children can learn through their own experience and at their own pace. They can respond at any moment to the natural curiosities that exist in all humans and build a solid foundation for life-long learning.

All teachers, Montessori included, draw from a common source: the child and our "best practices" for teaching and learning. There are, however, unique aspects to a Montessori environment.

- ❑ **Multi-year age span** - (3-6 years, 6-9 years, 9-12 years)
- ❑ **Individually prepared lessons** - small group lessons (2-6 children)
- ❑ **Uninterrupted work periods (2-3 hours)** during which the child schedules work Hands on materials for self-teaching
- ❑ **'Cosmic Education'** - describes the unique Montessori curriculum which gives the child a foundational sense of perspective of the interconnectedness of the universe.
- ❑ **Student Assessment** - assessment based on observation, student work journals, portfolios, and meetings with teacher<sup>iii</sup>

## The “Whole Child” Approach

The primary goal of a Montessori program is to help each child reach full potential in all areas of life. Activities promote the development of social skills, emotional growth, and physical coordination as well as cognitive skills. Under the direction of specially trained teacher, the holistic curriculum allows the child to experience the joy of learning, gives the child time to enjoy the process, ensures the development of self-esteem and provides the experiences from which children create their knowledge.

## Mixed Age Groupings

The multi-age grouping in each class provides a family-like setting where learning can take place naturally. More experienced children share what they have learned while reinforcing their own knowledge and skills. The multi-age community interaction is intrinsic to Montessori. This encourages rich language experiences, and opportunities for the development of empathy and social learning.

In order to respond to the diversity of individual children’s developmental needs, classes in the Casa and Elementary programs group children across a three-year age span. Toddler programs may have a one-year age span in order to comply with Ministry guidelines and/or the individual school’s programming.

Learning with and from each other to develop the social skills that form a class community. The social setting is like that of an extended family. The emergent skills of the individual children come together to form the class community.

## The Montessori Materials

Dr. Montessori's scientific observations of the children led her to design a number of multisensory, sequential, and self-correcting materials. These facilitate learning which builds from the concrete to the abstract in constructing their knowledge.<sup>iv</sup>

Our Parent Advisory Council may run a hot lunch program for students on Fridays.

### **PARENT VOLUNTEERS**

Parents of pupils are encouraged to participate in school activities in a number of capacities. Parents can help the school by volunteering to sponsor extra-curricular activities, volunteering to help tutor pupils in the classrooms. Parents can also be of assistance in fundraising, trips, etc., that will occur during the year. To volunteer your time, contact your child's teacher or Mrs. Bougerolle.

**Criminal Record Check** must be on file with the School District Office for any parents and/or guardians who volunteer. Criminal record checks must be updated every three years.
