### **Indigenous Education Report: N/A**

### **Any Other Business:**

Snow Removal: This year, there has not been adequate snow removal at the school. Parking lots, sidewalks, entry ways have been impassable for most of December and beginning of January. All agree this has been a record snowfall amount this year, and everyone has been left scrambling. However, the current situation is not tenable. Many vehicles have been stuck in the parking lot, egress from the building is a concern. Issues brought to Board by several PAC members yesterday. Near immediate action was taken by the board – 3<sup>rd</sup> party on contract to assist with snow removal (currently happening tonight). Parents who contact board office with concerns agreed they will contact board office again, thanking them for their action.

Mental Health in Youth: two recent suicides in the North Peace in elementary aged children. Is there anything we should be doing? Is there anything the district could do?

Mark – there are a lot of resources (age appropriate) to do with mental health in health class. This is part of the curriculum, addresses a lot of these issues. We want to bring in counsellors before things happen, and not after. The tricky part is you need parent referrals for a lot of these things, and often these are topics that are difficult for parents.

Madison – can we find some parent resources and send home?

Mark – will come up with something and send home to parents. There are regular meetings within the school with staff to discuss kids and their wellbeing, flag potential problems, and connect with parents.

All parents - Check ins at school are helpful, kids seem to participate and appreciate.

Mark - This is something that is unfortunately lost at middle school level.

#### School Activities:

Sarah – Chicken coop?

Mark – No (lol).

Sarah - Garden tower?

Mark – Always abandoned after a year... will ask if there are any floating around the district, maybe could try a used one.
