D2L Brightspace

Brightspace is a cloud-based learning management system that supports both online and blended learning. School District 59 is using Brightspace in conjunction with its Distributed Learning program.

Teachers use Brightspace to create and deliver course content, assessments, and activities in a centralized web-based platform. This includes creating, organizing, and sharing course materials, such as documents, videos, quizzes, and assignments. Teachers create and grade assignments, quizzes, and exams, and track students' progress using Brightspace's grading and analytics tools.

Desire2Learn requires personal information for your child to use Brightspace. Brightspace uses this information to provide the service, and additionally, they work with third party service providers that may collect, store, and/or process data on behalf of Desire2Learn.

More details can be found on Desire2Learn's privacy policy page:

<https://www.d2l.com/legal/privacy/>

School District 59

School Year

| | |
|---|---|
| Overview | <p>We are pleased to offer students of District 59 Peace River South free access to the Internet and to email. To gain access to this service, all students must obtain parental permission and must sign and return this form to the school office.</p> <p>Access to e-mail and the Internet enables students to explore thousands of libraries, databases and bulletin boards while exchanging messages with other Internet users throughout the world. Parents and students should be warned that some material accessible via the Internet contains information that is illegal, defamatory, inaccurate, and offensive to some people. While our intent is to make Internet access available to further educational goals and objectives, students may find ways to access inappropriate materials as well. We believe the benefits to students by accessing information and resources, and opportunities for collaboration, exceeds any disadvantages. While the school sets rules for use of the service, parents and guardians are responsible for setting and teaching the boundaries that their children must follow when using media and information sources.</p> |
| Email and Internet rules | <p>Students are to demonstrate acceptable behavior while using the school computer networks at a standard equal to their behavior in the classroom or a school hallway. Communications on the network are often public in nature. General school rules for language, and good behavior in their communications will always apply.</p> <p>Within reason, freedom of speech and access to information will be honored. Outside of school, families bear the same responsibility for such guidance as they exercise with information sources such as television, telephones, movies, radio, and other potentially offensive media.</p> |
| Data Protection | <p>Network storage areas may be treated like school lockers. Network administrators may review files and communications to maintain system integrity and ensure that students are using the system responsibly. It is important for users to know that files stored on district servers are not to be considered private.</p> |
| Data Protection (Continue) | <p>Any data stored on servers outside of School District 59 should not be considered as private and confidential as it could be accessed by others according to the laws of the host country (where files are stored). For example, if files are stored on a server in the United States, they may be legally subject to government review upon request; therefore, confidential, or private information should not be stored on these web-based services.</p> |
| PeaceNet Google Apps (Releasing Personal information) | <p>Google Apps is an email and document service that is provided by Google Inc. This service allows students to access documents at school and at home effortlessly with no need for additional software.</p> |
