Framework for Enhancing Student Learning ***School Goals***

Did you know? Each year staff select goals to work on with the students (student body or all the students) based on student data that is collected and analyzed. The goals this year are:

1. Students will increase their ability to build self-awareness and self-management skills as identified in the CASEL 5 competencies of Social Emotional Learning.
2. Students will become proficient in fact fluency based on the grade they are working at.
